

Accessories

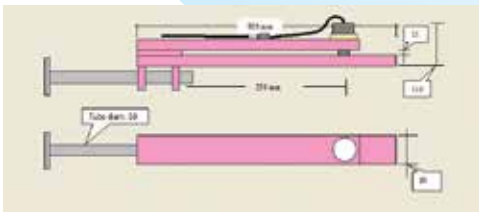

Very-Label

Automatic labeller marks defects, for selvage application, completed of pushbuttons.

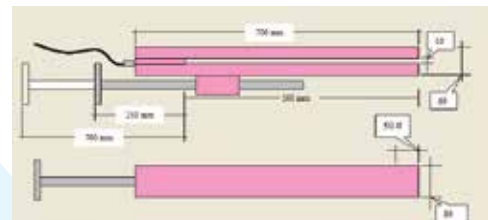

Very-Touch

Adhesive labels automatic applicator through electric-tire piston, suit of thermal printer on normal paper

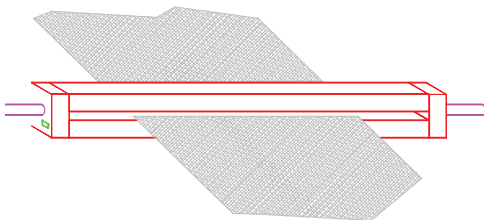

Contact seams survey

Contact equipment for seam survey, completed of sensor with nylon ring, cable of connexion and regulation stirrup.

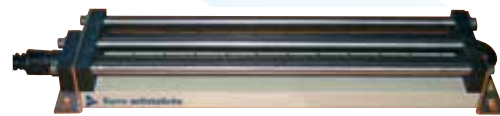

No contact seams survey

No contact equipment for seams survey, completed of sensor and electronic cable and assembly hinge.

Width control

Single width bar for continuous width fabric control, equipped of micro-controller for data vsualization.

Electrostatic bars

Device for electrostatic current dissipation, both positive and negative on production material, shockproof and explosion-proof type.

Metal detector

Metal detector device for electronic survey of magnetic and not magnetic metals.

Video cameras

Professional closed circuit video cameras, for distance control exited machine or face front design.

Display recorder

Microprocessor display recorder for visualization, memorisation and elaboration of measured data

Meters counter sensors

Mono/bi-directional encoder (1 pulse each mm.) and metric wheel for meters and speed fabric survey, completed of adipren metric wheel.

Meters counter

Meter counter equipments, impulses, timers with or without digital pre-selection.

Temperature sensor

Temperature sensor for the survey on brightness superficial and chromium plated in motion or in spin.
